**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED JUNE 30, 2009 AND 2008**

1. NATURE OF OPERATIONS AND GOING CONCERN UNCERTAINTY

Vaaldiam Resources Ltd. (the “Company” or “Vaaldiam”) is a publicly held company incorporated under the Canada Business Corporations Act. The Company is engaged in mining operations and in the investigation, acquisition, exploration and development of mineral properties. The Company operates in Brazil through its Duas Barras mine in the state of Minas Gerais and its Chapada mine in the state of Mato Grosso. Substantially all of the efforts of the Company are devoted to these business activities.

These unaudited interim consolidated financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. As at June 30, 2009 the Company had no sources of operating cash flows as a result of its decision to place its Duas Barras and Chapada mines on care and maintenance until such time as diamond prices recover or costs are reduced to a level that would allow for positive cash flows from operations. The Company will therefore require additional funding which, if not raised, would result in the further curtailment of activities and project delays. As at June 30, 2009, Vaaldiam had a working capital deficit of \$7,784,195 and had incurred losses since inception resulting in an accumulated deficit of \$122,363,049. The Company’s ability to continue as a going concern is uncertain and is dependent upon its ability to continue to raise adequate financing and to achieve profitable operations in the future. There can be no assurances that the Company will be successful in this regard, and therefore, there is substantial doubt regarding the Company’s ability to continue as a going concern, and accordingly, the use of accounting principles applicable to a going concern. These unaudited interim consolidated financial statements do not reflect adjustments that would be necessary if the “going concern” assumption were not appropriate. If the “going concern” assumption were not appropriate for these unaudited interim consolidated financial statements, then adjustments to the carrying values of the assets and liabilities, the reported revenues and expenses and the balance sheet classifications, which could be material, would be necessary.

2. BASIS OF PRESENTATION

The unaudited interim consolidated financial statements have been prepared by management in accordance with Canadian generally accepted accounting principles (“CGAAP”) for interim financial statements on a going concern basis and do not contain all of the disclosures required for annual financial statements. As a result, these unaudited interim consolidated financial statements should be read in conjunction with the Company’s annual audited consolidated financial statements as at and for the years ended December 31, 2008 and 2007.

The unaudited interim consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries:

- Vaaldiam do Brasil Mineração Ltda. (“VBM”);
- Mineração Montes Claros Ltda. (“Montes Claros” or “MMC”);
- Elkedra Diamonds Pty Ltd. (formerly Elkedra Diamonds N.L.) (“Elkedra”);
- Chapada Diamonds Limited (“CDL”);
- Chapada Brasil Mineração Ltda. (“CBM”);
- Great Western Diamonds Corp. (“Great Western”);
- Oleander Financial Inc. (“Oleander”);
- Mineração Fortuna Ltda. (“Fortuna”);
- Lipari Administração de Bens e Participações Ltda. (“Lipari”); and
- RST Recursos Mineraiis Ltda. (“RST”).

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED JUNE 30, 2009 AND 2008**

2. BASIS OF PRESENTATION (CONTINUED)

All inter-company balances and transactions have been eliminated on consolidation.

(a) New Accounting Pronouncements:

(i) International Financial Reporting Standards

On February 13, 2008, the Accounting Standards Board announced that publicly accountable entities will be required to prepare financial statements in accordance with International Financial Reporting Standards ("IFRS") for interim and annual financial statements for fiscal years beginning on or after January 1, 2011. The Company is assessing the impact of the conversion from CGAAP to IFRS on the consolidated financial statements and will develop a conversion implementation plan.

(ii) Goodwill and Intangible Assets ("Section 3064")

Effective January 1, 2009, the Company adopted Section 3064. This section provides guidance on the recognition of intangible assets in accordance with the definition of an asset and the criteria for asset recognition, clarifying the application of the concept of matching revenues and expenses, whether these assets are separately acquired or are developed internally. The adoption of this section did not have a material effect on the Company's financial position or results of operations.

(iii) Credit Risk and the Fair Value of Financial Assets and Liabilities ("EIC-173")

In January 2009 the Emerging Issues Committee ("EIC") issued EIC-173. In this EIC the Committee reached a consensus that in determining the fair value of financial assets and financial liabilities an entity should take into account the credit risk of the entity and the counterparty. The adoption of this EIC did not have a material effect on the Company's financial position or results of operations.

(iv) Mining Exploration Costs ("EIC-174")

In March 2009 the EIC issued EIC-174. In this EIC the Committee reached a consensus that a mining enterprise that has not established mineral reserves objectively and, therefore, may not have a basis for preparing a projection of the estimated future net cash flow from the property, is not precluded from considering exploration costs to have the characteristics of property, plant and equipment. The EIC also provides guidance on when impairment should be assessed and what conditions indicate impairment for capitalized exploration costs. This EIC is consistent with the Company's existing accounting policy for capitalization of exploration costs and did not result in any changes to the Company's financial position or results of operations.

3. ACQUISITIONS

Acquisitions are accounted for using the purchase method, whereby identifiable assets and liabilities are recorded at their fair market values as of the date of acquisition.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED JUNE 30, 2009 AND 2008**

3. ACQUISITIONS (CONTINUED)

GREAT WESTERN DIAMONDS CORP.

On January 2, 2008, pursuant to a takeover bid to acquire all of the outstanding shares of diamond explorer Great Western, a company then listed on the TSX Venture Exchange, the Company took up 82,535,960 Great Western shares in exchange for 37,141,180 Vaaldiam shares at the takeover bid exchange ratio of 0.45 of a Vaaldiam common share per Great Western common share. The Company then proceeded to effect a subsequent acquisition transaction to acquire Great Western shares not tendered to the offer.

A Great Western Shareholder Special Meeting was held on February 27, 2008 and a resolution passed approving the arrangement whereby Vaaldiam acquired the issued share capital of Great Western which it did not already own, and an additional 8,553,657 shares were issued. A final order was obtained from the Court of Queen's Bench for Saskatchewan on March 6, 2008, the arrangement became effective on March 10, 2008 and Great Western was delisted on March 11, 2008.

On February 27, 2008, Great Western closed a private placement consisting of 8,000,000 flow-through shares priced at \$0.25 for aggregate gross proceeds of \$2,000,000. The agent received a cash commission of 7.5% of the gross proceeds as well as 600,000 broker warrants, each entitling the agent to acquire one common share of Great Western at a price of \$0.25 until February 27, 2009.

The purchase price was calculated as follows:

Common shares issued (45,694,837 common shares at average cost of \$0.5306 per share)	\$ 24,247,529
Fair value of 14,949,030 warrants and options issued	461,930
Cash paid for 1,111,112 Great Western shares	500,000
Transaction costs	885,792
Purchase price	\$ 26,095,251

The fair values of the warrants and options were estimated using the Black-Scholes option pricing model based on the following assumptions:

Risk-free interest rate	3.1%-3.35%
Expected dividend yield	0.00%
Expected share price volatility	44.3%-63.0%
Expected life of warrants and options	0.3-4.1 years

The purchase price was allocated as follows:

Restricted cash acquired	\$ 3,111,489
Non-cash working capital deficit	(876,346)
Property, plant and equipment	204,878
Mineral properties	29,588,048
Future income taxes	(5,932,818)
Net identifiable assets	\$ 26,095,251

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED JUNE 30, 2009 AND 2008**

3. ACQUISITIONS (CONTINUED)

RST RECURSOS MINERAIS LTDA.

On July 1, 2008, the Company entered into an agreement with Thanda Vantu – Investimentos E Participações SGPS, S.A. (“Thanda”), Redburn Investments Inc. (“Redburn”), Marrakwene Holding, Investimentos E Participações, Ltda. (“Marrakwene”) and Geraldo Antonio Kulaif (“Geraldo”) to acquire 100% ownership of RST and to acquire the outstanding RST loans from Marrakwene and Redburn. RST owns the Peçanha mine and concessions adjacent to the Duas Barras mine in the state of Minas Gerais, Brazil.

The purchase price for the acquisition was as follows:

- US\$1,500,000 less US\$330,000 representing agreed liabilities of RST at July 1, 2008 paid in common shares of the Company; and
- US\$9,000,000 less approximately US\$1,400,000 representing certain payables of RST at July 1, 2008.

On July 1, 2008, the Company made a payment consisting of 3,374,185 common shares and cash of US\$500,000. A balance of approximately US\$8,500,000 consisting of the remaining US\$7,100,000 of cash due to Marrakwene and Redburn and approximately US\$1,400,000 due to an RST supplier remains unpaid at June 30, 2009.

In January 2009, the Company entered into a settlement agreement with respect to the unpaid balance of US\$8,500,000 (see Note 8). In August 2009, titles to the property, plant and equipment and the mineral properties of RST were transferred back to the vendors of RST and Vaaldiam as settlement of the US\$8,500,000 payable in respect of RST transaction.

The acquisition was recorded as a business combination. The purchase price was calculated as follows:

Common shares issued (3,374,185 common shares at cost of \$0.32 per share)	\$	1,079,739
Cash		509,300
Payable		8,658,100
Transaction costs		56,280
Purchase price	\$	10,303,419

The allocation of the purchase price is as follows:

Cash	\$	37,431
Non-cash working capital deficit		(231,342)
Property, plant and equipment		7,189,542
Mineral properties		3,307,788
Net identifiable assets	\$	10,303,419

4. INVENTORIES

Inventories at June 30, 2009 and December 31, 2008 are comprised of the following:

	June 30, 2009	December 31, 2008
Rough diamonds	\$ 5,542	\$ 43,689
Supplies inventory	76,606	78,345
	\$ 82,148	\$ 122,034

5. BRAZILIAN TAXES AND CONTRIBUTIONS RECOVERABLE

Brazilian taxes and contributions recoverable consist of recoverable credits for ICMS, PIS and COFINS. ICMS is the State Value Added Tax imposed by the individual states in Brazil. PIS and COFINS are Federal Contributions for the purposes of social financing. An ICMS taxpayer may recover input tax charged on certain goods and services and PIS and COFINS taxpayers may recover input contributions charged on certain good and services. The charges that are recoverable are in respect of purchases made for the purpose of manufacturing or production of supplies, and can be recovered, amongst other methods, as a deduction from output tax charged on the goods sold, and in the case of PIS and COFINS, can be set off against federal withholding taxes and income taxes. At June 30, 2009, a provision of \$2,022,765 had been made against these taxes and contributions, as it is not certain that these amounts will be recovered due to the cessation of the Company's production activity.

7. MINERAL PROPERTIES (CONTINUED)

In light of the deteriorating market conditions and the results of operations during 2008, the Company placed the Duas Barras mine and the Chapada mine on care and maintenance until such time as diamond prices recover and costs are reduced to a level that will allow for positive cash flows from operations.

The carrying amounts of all projects were assessed for impairment based on management's assessment of potential indicators of impairment and best estimates of likely courses of action by the Company. The fair values were determined using a variety of valuation methods, the selection of which was based on the method considered most applicable to each project. These methods included discounted cash flows over the life of the asset, reviewing comparable transactions and assessing value per unit of area. The assessment of the carrying value and the determination of these fair values is subject to significant measurement uncertainty and further material write-downs of these assets could occur if actual results differed from the estimates and assumptions used and/or if alternative valuation methods were applied.

On May 26, 2009 Vaaldiam announced the sale of an 80% equity interest in the Braúna diamond project to an arm's length private group. Under the terms of agreement, Vaaldiam will receive a cash payment of \$3.8 million (US\$3.3 million) and will be carried through the next phase of development on the Braúna property, of which Vaaldiam's share payable by the purchasers is \$0.4 million for a bulk sampling program with an estimated cost of \$2 million. Included in the program costs are approximately \$0.9 million of Vaaldiam's current liabilities associated with capital equipment purchases which would be paid out of the program funds by the purchasers during the months of July and August 2009. Vaaldiam will remain operator of the joint venture during the period of the bulk sampling program. Under the terms of the agreement, the cash component of the transaction is payable in tranches as follows:

- i) US\$660,000 upon execution of the Letter of Intent;
- ii) US\$990,000 payable upon the execution of the formal agreements relating to the transaction; and
- iii) US\$1,650,000 30 days following the execution of the formal agreements.

On July 1, 2009 Vaaldiam signed a joint venture agreement with the private group and will transfer title to the Braúna diamond property to a joint venture company called Lipari Administração de Bens e Participações Ltda. ("Lipari"). Vaaldiam holds a 20% equity interest in Lipari while the private group holds an 80% equity interest. Vaaldiam can increase its interest in the project to 49% following the completion of the next phase of development by reimbursing the private group 100% of their costs incurred to that date. The agreement also allows Vaaldiam to retain the rights to the gold potential of the Braúna project area, however, the joint venture will have ownership of any by-product gold recovered as a consequence of diamond mining activities.

As at June 30, 2009 the Company had received the first tranche of US\$660,000 purchase price and US\$484,000 as advance funding for the bulk sampling program. These amounts are recorded as an advance as at June 30, 2009 pending the execution of the formal agreements. The carrying value of the Brauna property was written down by \$6,623,903 to \$4,568,188 as at June 30, 2009 to reflect the implied fair value of the property in the transaction.

8. DISCONTINUED OPERATIONS

In January 2009, the Company reached a settlement agreement in principle with Thanda, Redburn, Marrakwene and Geraldo whereby all of the real property, fixed assets, equipment, concessions, mineral rights and licences of RST would be transferred to Marrakwene. In exchange, the remaining US\$8.5 million due on the RST acquisition, made up of the loans payable to Marrakwene and Redburn, and the amount due to an RST supplier, would be transferred to Marrakwene. Vaaldiam and RST would be released of any obligation to pay additional amounts under the original acquisition agreement.

The results of operations of RST have been reported separately as "Discontinued operations" for the three and six months ended June 30, 2009.

Discontinued operations include the following amounts:

9. LINE OF CREDIT

In June 2008, the Company obtained an unsecured revolving line of credit of US\$2,500,000. Interest for this line of credit is payable quarterly and is determined based on the three-month US\$ LIBOR rate plus 2.75% on the date of each drawdown. Under the terms of the agreement, the creditor may demand repayment at any time by providing 90 days written notice. As at June 30, 2009, the Company had drawn down a total of US\$2,340,000.

10. ASSET RETIREMENT OBLIGATIONS

Any restoration, rehabilitation and environmental costs incurred at the Duas Barras and Chapada mines during the life of the mines are expensed immediately as rehabilitation is incurred on an ongoing basis. The asset retirement obligations relate to the closure and reclamation costs associated with the Duas Barras and Chapada mines and associated processing facilities. The Company has estimated the net present value of the obligations using discount rates between 8.2% and 10%. The total closure and reclamation costs are estimated at R\$1,156,000 to be incurred between 2012 and 2014.

Changes to the asset retirement obligation during the year are as follows:

Balance, January 1, 2009	\$	410,298

(c) Stock Options

The Company maintains a stock option plan for directors, officers, employees and consultants of the Company. This plan was amended in June 2005, and under the amended plan, which requires approval by the shareholders on an annual basis, the maximum number of shares which may be issued under the plan cannot exceed 10% of the issued and outstanding common shares of the Company at the time of grant of any option. All options normally vest immediately upon issue or three months after commencement of employment or contract, whichever is later.

13. MANAGEMENT OF CAPITAL

As at June 30, 2009, the Company had a working capital deficit of \$7,784,195 and had incurred losses since inception resulting in an accumulated deficit of \$122,363,049. The Company's ability to continue as a going concern is uncertain and is dependent upon its ability to continue to raise adequate financing and to achieve profitable operations in the future.

The Company considers its management of capital to include all components of debt and shareholders' equity. Its objectives are to ensure that the Company continues to operate as a going concern, if possible, in order to pursue the operation of its mines and the development of its mineral properties, to sustain future development and growth as well as to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new shares, seek debt financing, or acquire or dispose of assets. The Company, upon approval from its Board of Directors, makes changes to its capital structure as deemed appropriate under the specific circumstances.

As at June 30, 2009, the Company has drawn down a total amount of US\$2,340,000 of a revolving line of credit (see Note 9), and is in the process of seeking alternative financing and disposing of certain assets.

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
FOR THE THREE MONTHS ENDED JUNE 30, 2009 AND 2008**

14. FINANCIAL INSTRUMENTS

The Company's financial instruments are exposed to certain financial risks, including currency risk, credit risk, liquidity risk and price risk.

(a) Currency risk

The Company's sales are denominated in United States dollars. The Company operates primarily in Brazil and a significant portion of the Company's operating costs and capital expenditures are denominated in the Brazilian real and Canadian dollar. As a result, the Company is also exposed to the currency fluctuations relative to these two currencies. A significant change in the currency exchange rates between the Brazilian real and United States dollar relative to the Canadian dollar could have an effect on the Company's results of operations, financial position or cash flows. The Company has not hedged its exposure to currency fluctuations.

At June 30, 2009, a 10 percent change in the exchange rate between the Canadian dollar and the US dollar with all other variables held constant would result in a change of \$1.1 million in net income. Similarly, a 10 percent change in the exchange rate between the Canadian dollar and the Brazilian real with all other variables held constant would result in a change of \$0.5 million in net income.

(b) Credit risk

Credit risk is the risk of unexpected financial loss to the Company if a customer or third party to a financial instrument fails to meet its contractual obligations.

As the sales of the Company are predominantly through uptake agreements with two customers, the Company is exposed to the concentration of credit risk on the accounts receivable from its customers. However, the uptake agreements provide for a relatively short credit period and thus reduce any credit risk.

(c) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure as outlined in Note 13 and continuously monitors its forecast and actual cash flows from operations. To the extent that the Company expects it does not have sufficient liquidity to meet these obligations, management will endeavour to secure additional funds through debt or equity transactions. There can be no guarantee that management's efforts to secure additional funds will be successful.

(d) Price risk

The Company is exposed to price risk with respect to commodity prices through the price of diamonds and gold and also through various input prices such as electricity and fuel. The Company monitors the price of commodities continuously as well as major input prices and considers the risk exposure to fluctuating prices.

15. RELATED PARTY TRANSACTIONS

Transactions with related parties, all of which are recorded at the exchange amount which is the amount of consideration agreed upon by the related parties, are as follows:

Six months ended June 30	2009	2008
Management and consulting fees paid or payable to a company controlled by the:		
Former Vice President, Business Development ^{1,2}	\$ -	\$ 113,776
Former Vice President, Technical Services ¹	-	115,972
	\$ -	\$ 229,748

¹ Effective November 2008, the former Vice President, Business Development and former Vice President, Technical services are no longer officers of the Company.

² The former Vice President, Business Development continues to serve as a member of the Board of Directors.

On May 13, 2009, the Company received a loan of US\$58,192 from Zoneplan Limited, a wholly owned subsidiary of Santa Elina Mining Corporation ("SEMC"), which is Vaaldiam's largest shareholder. The loan is interest-free and is due and payable in 90 days upon demand. In addition, SEMC has made payments of approximately \$82,000 on behalf of the Company for expenditures in Brazil.

16. LOSS PER SHARE

For the purpose of the determination of net loss per share, the basic and diluted weighted average number of common shares outstanding for the three months ended June 30, 2009 was 245,700,733 (2008: 210,075,960). The determination of the weighted average number of common shares outstanding for the calculation of diluted loss per share does not include the effect of outstanding warrants and options since to do so would reduce the loss per share and would therefore be anti-dilutive.

17. SEGMENTED INFORMATION

The Company operates in the diamond exploration and mining industry in Brazil, Canada and Australia. The Company has three reportable segments: the Duas Barras mine, the Chapada mine, and corporate and other. The corporate segment includes the Company's administrative, business development and exploration activities. The Company considers each mine as a separate business unit because the recovered diamond grade and the quality and size of the diamonds recovered varies significantly between the two mines.

Contingencies

Subsidiaries of the Company have been served claims by former employees in Brazil in relation to wrongful dismissal, lost wages, overtime and reimbursement of expenses. Some of these claims are still subject to court judgment, while others are in the process of being appealed. In the opinion of management and on advice of legal counsel, these matters are without merit; however, based on the expected outcome of these claims, a provision has been made for the claims in the unaudited interim consolidated financial statements. In addition, a lien was made by a former employee on an asset of the subsidiary to the amount of approximately \$265,000.

21. SUBSEQUENT EVENTS

(a) Settlement of payable in respect of RST acquisition

In August 2009, titles to the property, plant and equipment and the mineral properties of RST were transferred back to the vendors of RST in settlement of the US\$8,500,000 payable in respect of RST transaction (see Notes 3 and 8).

(b) Braúna joint venture agreement

On July 1, 2009, an 80% equity interest in Lipari was transferred to an arm's length private group upon the execution of the formal agreements relating to the transaction. During July and August 2009, the Company received cash payments totaling US\$1,540,000 in respect of the purchase price with an additional US\$1,100,000 to be paid (see Note 7).
